International Trade Institute

General English (January - December 2022)

Frequency and duration: ten x two-hour classes

The Aim of the Class:

The aim of the General English class is to provide a stress-free environment in which students can learn English on a variety of everyday topics – both social and business.

Class Description:

Exercises on a general theme are created in a mini-student booklet. These exercises could be connected to grammar, reading comprehension, listening, vocabulary, or general discussion. Opportunities for students to give their opinions about different topics and their life experience are provided during each class.

Class Materials:

The materials for the class are all created by the teacher. These could have come from books, the Internet, or from the teacher's imagination. This means that the class can be adapted to the specific needs of the students in terms of content, difficulty, and amount of work created. After materials are presented and used in class, all of the answers and any audio files used will be made available to the students.

Class Breakdown:

Each theme will take approximately 6-7 hours (i.e., 3-4 weeks). Topics will be prepared after consultation with the students in the class.
